

**Session V,
Parallel C: RES, The Developers
Meeting**

Introduction

RES Development and Targets in SE Europe

- High potential of RES in SE Europe
- RES for heating/cooling, power generation, biofuels
- Europe's ambitious RES target 20% by 2020 would be extended to the Region
- Regulatory framework for RES, sharing the same vision in the Region,
- Aggressive power generation target by RES would be 33% by 2020
- Challenges to be faced:
 - Mixing of RES forms and traditional energy resources as well, in the
Country scale and Region scale
 - Building sufficient transmission infrastructure and operations strategies
 - Minimizing adverse impacts on the surrounding environment
 - Developing tools to properly integrate variable renewable resources
 - Addressing to future networks, impacts on system reliability and dispatch ability, market structure, services, technologies, system
