

## DEVELOPMENT and OPERATION of the ALEXANDROUPOLIS INGS

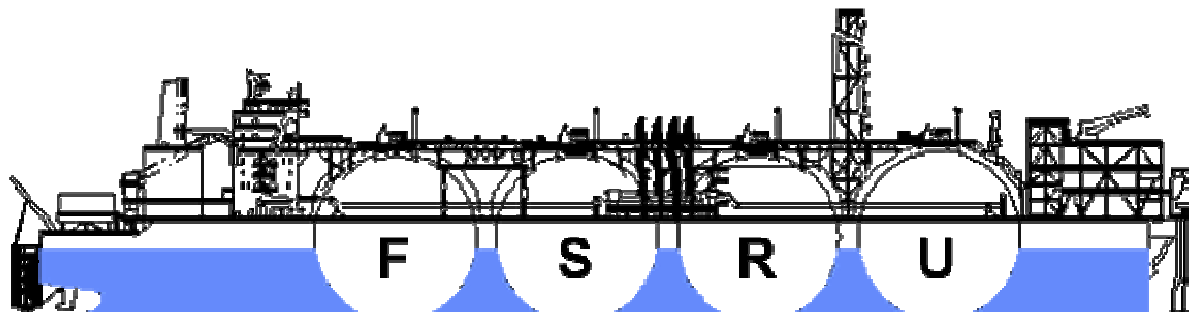

- **GASTRADE S.A.**
- **Established with the purpose of developing & operating Alexandroupolis INGS**
- **In line with EU's 3<sup>rd</sup> Energy Package (dir. 2009/73/EC) and Greek Energy Legislation (law 4001/2011 for "the organisation and operation of the Energy Markets")**
- **Non-discriminatory access to 3<sup>rd</sup> parties. Enhancing competition and challenging existing local gas supply cost structures**
- **In harmony with the approved mid-term development strategy of the National Gas Transmission System (NGTS) and with a view to the major international gas infrastructure projects in SE Europe (South Corridor, Balkans Ring, South Stream)**

## A FLOATING REGASIFICATION UNIT DELIVERING GAS ONSHORE

- The project comprises 2 main components:
  1. The offshore Floating LNG Terminal including:
    - The Floating LNG Storage and Re-gasification unit (FSRU) with initial LNG storage capacity of 135,000 m<sup>3</sup> and projected annual gas send-out of 2.6 bcm
    - The permanent FSRU mooring system for the anchoring of the FSRU and the transmission of gas from the FSRU to the subsea pipeline
  2. The natural gas transmission pipeline system which is divided into 2 sections:
    - The subsea section of total length 24.2 km
    - The onshore section of total length 4.5 km connecting the FSRU system to the National Gas Grid
    - The M/R station at the connection point between INGS and NGTS

# The FSRU CONNECTS to NGTS THROUGH A SYSTEM OF SUBSEA and ONSHORE PIPELINES

## ALEXANDROUPOLIS LNG INGS

### OFFERING DIRECT & FLEXIBLE ACCESS TO THE INTERNATIONAL GAS MARKETS

- **Strategically located to attract a variety of major international supply sources**
- **Feeding into the Greek National gas transmission system and the Greek gas market**
- **Offering direct access to the Balkans and Eastern European gas markets**
- **Ability to link and feed into the future South Corridor Gas Projects (ITGI, TAP) and access the Western European Markets**
- **Possibility to access the South Stream project**
- **Presenting an attractive business opportunity with solid return on capital invested**
- **The project has received production license from the Greek Energy Regulator (RAE) and from the Ministry of Environment, Energy and Climate Change (19.08.2011)**
- **Planned project start up: 2015**
